FunTime Dual Crane

Double the Claws, Double the Fun: FunTime Dual Player Claw Machine is a Game-Changer

If you thought claw machines were already a blast, wait until you experience the thrill of two players going head-to-head — or side-by-side — on one sleek, action-packed cabinet.

The FunTime Dual Player Crane machine takes the classic arcade staple to the next level by doubling up on everything: controls, claws, prize paths, and most importantly, the excitement.

At first glance, this machine is an instant attention grabber. Thanks to its bright animated LED lighting, a striking mirrored back panel that makes prizes shine from every angle, and a glowing LED top panel, it's practically begging for a crowd to gather.

The optional live camera feed displayed on a top monitor lets onlookers watch the intense claw battles unfold in real time, making it as much a spectator sport as it is a player's challenge.

What really sets this model apart is the social factor. With two illuminated player stations equipped with dual controls, the machine invites friendly rivalry or cooperation.

This interaction tends to pull in more traffic, as curious passersby can't resist stopping to watch and then jump in for a turn.

From an operator's perspective, this dual-player setup is a must have for any location. Doubling the number of players per machine means more plays per hour.
